

SYNOPSIS In *Revenge of the Electric Car*, director Chris Paine takes his film crew behind the closed doors of Nissan, GM, and the Silicon Valley start-up Tesla Motors to chronicle the story of the global resurgence of electric cars. Without using a single drop of foreign oil, this new generation of car is America's future: fast, furious, and cleaner than ever.

With almost every major car maker now jumping to produce new electric models, *Revenge* follows the race to be the first, the best, and to win the hearts and minds of the public around the world. It's not just the next generation of green cars that's on the line. It's the future of the automobile itself.
